

ROBERT PRICE

Our Environmental Policy

We are distributors of building and timber products for use in the building industry. We recognise the benefits of being environmentally friendly in our business and will promote good environmental practice by all our staff.

We aim to minimise the extent of environmental damage occurring as a result of our activities whilst fully complying with all relevant statutory regulations.

Directors are responsible for ensuring sufficient personnel and financial resources are made available, monitoring progress against environmental targets and co-ordinating overall implementation of our policy. **Branch Managers** and **Department Heads** are responsible for management of environmental obligations and performance and for achieving progress against agreed targets. **All Employees** are responsible for ensuring high standards of environmental care.

We will show our commitment for the environment by:

- Complying fully with all relevant environmental legislation and other statutory requirements as a minimum standard
- Implementing an environmental improvement programme through the development of our Environmental Management System
- Planning and undertaking our operations so as to minimise our/the impact on the local environment (in all aspects of our business)
- Seeking to minimise the risk of pollution as a result of our operations, through staff training and awareness of the improvement programme
- Seeking to minimise energy use in the day to day running of our business through the introduction of energy saving initiatives
- Reducing, reusing and recycling waste, where possible
- Maintaining Chain of Custody certification to prove that our timber products are where possible, from legal and sustainable sources.
- Raising the awareness of our staff of environmental issues
- Endeavouring to raise our customers' awareness of environmentally friendly building materials which could help them to save energy
- Making our policy available to the public via our web site

Through the above we will continually seek to improve our environmental performance.

Our Policy will be reviewed and updated at regular intervals.

Dated 4th June 2008
